FOREVER BETTER

2011

VOLUME III

Miele

B999799 10-11

FINDING BETTER SOLUTIONS FOR MORE THAN A CENTURY.

Since 1899, Miele has created thoughtfully designed, precisely engineered home appliances that fulfill the company's founding promise of 'Immer Besser' — a German phrase meaning 'Forever Better.' Our company's pursuit of excellence and commitment to uncompromising quality has never been simply about better home appliances. Instead, it has always been about discovering and developing ways to help our customers 'live better.'

Designed for longevity and durably crafted, our full suite of home appliances delivers many years of exceptional performance. Our functionally superior solutions and intuitive technology complement your passion for a beautiful, healthy and comfortable home, while our distinctive, refined designs suit any kitchen décor. So whether you're putting away brilliantly clean dishes or talking with guests as dinner warms, you'll savor the quiet confidence and gratification of a job well done — and a life well lived.

ELEGANT IN EVERY DETAIL. **BETTER IN EVERY WAY.**

At the heart of every appliance within Miele's integrated, standard-setting range are better solutions to everyday tasks. How can the integrity of food and wine be preserved longer? How can high-quality garments and flooring be cared for easier? How, ultimately, can quality of life be enhanced for those who make Miele an integral part of their life?

Miele appliances are tested to care for precious clothes, dishes, food and wine with unrivaled precision for 20 years. Each appliance bearing the Miele name reflects the finest German engineering and ensures the performance you expect, the peace of mind you deserve and the energy-efficiency necessary to protect the earth's natural resources.

PRESERVES
FLAVORS PERFECTLY.
PROTECTS THE INTEGRITY OF YOUR FOODS FLAWLESSLY.

With self-adjusting temperature and humidity controls, Miele refrigerators and cooling systems preserve the full flavor and nutritional value of your foods, while complementing your design style perfectly.

INTELLIGENT REFRIGERATION ENSURES OPTIMUM, MULTI-ZONE COOLING AND HUMIDITY.

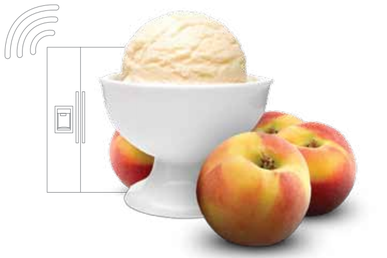
Imagine meats and cheeses that stay fresher — longer. And spinach that doesn't wilt after a few days. At Miele, we've created the world's most advanced refrigeration technology and developed MasterCool™, a highly intuitive cooling system that locks in freshness and nutrients with the push of a button.

There's no guesswork needed. No product manual required. With a few simple selections, your Miele refrigerator self-adjusts the temperature and humidity in each of its independent cooling zones. So your meats are more flavorful. Your vegetables are more robust. And your time isn't wasted on changing your refrigerator's settings after every trip to the market.

ClearView™ *lighting keeps groceries perfectly illuminated, while MasterCool™ technology keeps them at their ideal temperatures.*

STATE-OF-THE-ART FREEZING KEEPS FOODS FRESH AND FLAVORFUL.

Now you can be confident that your frozen groceries will taste the way nature intended. After stocking your freezer with all of your meats, vegetables and desserts, you can restore your freezer's climate quickly by activating SuperCool™, a feature that allows you to accelerate your freezer's cooling and ensure that your groceries are always preserved at their peak freshness.



RemoteVision™ *connects your smart refrigerator or wine storage unit by WiFi to our Miele monitoring center. By tracking your operating data, we'll know if it ever experiences a drop in performance, and we'll contact you immediately for a quick remedy, preventing you from possibly losing valuable groceries and wines.*

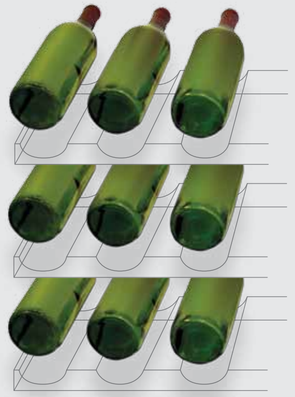
All Miele bottom-mount refrigerator freezers (as shown here) feature dual compressors. These independent cooling and evaporating circuits prevent the exchange of air between your refrigerator and freezer, so your foods — and your ice cubes — always taste fresh.

EASIER ACCESS WITH BOTTOM-MOUNT DESIGNS.

Contemporary yet classic, our refrigerators with bottom-mount freezers are our most popular cooling systems, and for good reason. As a stand-alone solution, all of your gourmet groceries are well within your reach. The bottom-mount freezer glides open smoothly to reveal ample storage space, and the refrigerator and freezer feature separate cooling systems to eliminate flavor transfer between the two. Both left- and right-hinged models are available, so you're free to plan the flow of your kitchen according to your needs, not your appliances.

EXCEPTIONAL WINE STORAGE. EXQUISITE PRESENTATION.

As much as you treasure your valuable collection of wines, we treasure the technology that protects it. Our dynamic cooling systems safeguard your wines from unwanted fluctuations in temperature, humidity and vibration. By storing your reds, whites and sparkling wines in three individual cooling zones, you'll experience the wine's full complexity, and you'll take comfort knowing that every bottle is ready for that next special occasion or intimate dinner party.



With 14 shelves crafted from acacia wood and a unique LED lighting system, Miele wine storage elegantly showcases your favorite vintages behind a full-length, UV-protected glass door.

OUR PASSION
FOR BETTER
TECHNOLOGY.
YOUR PASSION FOR BETTER COOKING.

From traditional to steam, speed to microwave, Miele's standard-setting collection of ovens delivers precise temperature control with impeccable consistency and functionality. The result is cooking performance you'll savor meal after meal and year after year, whether you're baking, roasting or warming.

Classic Series ovens feature Miele's all-new Signature Handle, complementing our full array of premium appliances.

THE CLASSIC SERIES

A FRESH TAKE ON LEGENDARY MIELE QUALITY.

Miele ovens have always been designed to help you prepare your favorite meals perfectly and precisely — and the Classic Series delivers on that promise with intuitive controls, professional features and traditional styling. With your choice of touch-screen MasterChef settings or Chef Series dials, plus the all-new Signature Handle that fits seamlessly with the look of our other premium appliances, you'll have the best of Miele performance and design at your fingertips every time you cook.

Classic Series

featuring Clean Touch Steel™ and Signature Handle

THE EUROPA SERIES

FORWARD THINKING BY DESIGN.

With sleek, black glass trim for a more linear appearance, plus the refined look and feel of Miele's Square Handle, the Europa Series brings understated, contemporary style right into your kitchen. Equipped with advanced technology like MasterChef and featuring the same chef-inspired details that have made Miele a trusted name in homes everywhere, the Europa Series is a perfect fit for today's modern kitchens.

Europa Series

featuring black glass trim and Square Handle

BETTER IS MORE FLEXIBLE.

From clean, contemporary spaces to more traditional environments, Miele's lineup of ovens, warming drawers and storage drawers is designed to reflect your unique sensibilities. Whether it's more ergonomic installation or your choice of designs like the Classic and Europa, Miele delivers flexibility, style and performance that extends throughout the kitchen — no matter your floorplan or existing interior.

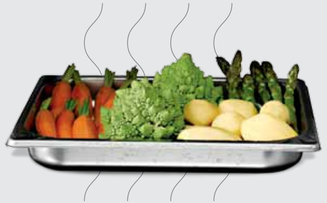
Save time and extra steps when preparing meals with Miele's fully integrated speed oven, designed with the benefits of both a traditional oven and a microwave.

LESS TIME COOKING MEALS. MORE TIME ENJOYING THEM.

Powerful, versatile and incredibly easy to use, the Miele speed oven combines two advanced cooking technologies, microwave and convection, so you can defrost, heat and crisp all in a single oven. This integrated design delivers the delicious, browning capabilities of a traditional convection oven with the speed and convenience of a modern microwave. The result is an easy-to-use, easy-to-clean oven that can cook a wide range of meals – in a fraction of the time.

SMARTER, HEALTHIER, FULL-OF-FLAVOR COOKING.

Just as cooking with steam has long been celebrated for its many health benefits, Miele has long been heralded for producing the ultimate steam oven technology. By delivering a superior balance of heat and moisture, these innovative ovens cook quickly and efficiently without foods losing their nutrients and flavors – without the need for adding additional butters and oils. Whether built-in alone or part of a stacked configuration, Miele's easy-to-use steam ovens help you transform your fresh ingredients and ideas into delicious, health-conscious meals.



Unlike most steam ovens, our steam ovens are equipped with an external steam generator, providing better heat performance with pure, convection steam and more consistent cooking temperatures.

MIELE MICROWAVE — ESSENTIAL IN ANY KITCHEN.

Miele's 1,000-watt microwave offers a premium quality, built-in solution to all of your quick-cooking needs. With 11 intuitive cooking modes and an automatic 'Keep Warm' function, this extremely versatile oven combines efficiency with ease-of-use. The result is a microwave that makes quick work of defrosting, heating and reheating – and makes it possible to incorporate a microwave into a truly integrated Miele kitchen.

BETTER IS MORE PERSONAL.

From bold contemporary interiors to elegant traditional environments, Miele's modular appliances are designed to reflect your style and sensibilities. Built-in ovens, for example, can be configured both vertically and horizontally, and dishwashers, warming drawers and other appliances can be installed easily under counters, providing you with the flexibility to organize your appliances in the most ergonomic, practical and visually appealing way possible.

EFFORTLESSLY WARMED AND READY.

Whether maintaining the temperature and moisture of entrées and side dishes before serving, or warming plates and cups for thoughtful, elegant presentation, Miele warming drawers are a convenient way to manage the details and timing of a perfect meal. With simple, touch-control settings and convection heat technology, the drawers are designed to maintain consistent heat as efficiently as possible.

Warming drawers for plates, cups or food are ideal for installation beneath a built-in coffee system, a steam oven or another Miele appliance.

CRAFTED WITH PRECISION. **SO YOU CAN COOK WITH CONFIDENCE.**

Designed for preparing quick, casual dinners and elaborate, gourmet meals alike, our cooktops and CombiSets™ blend easy-to-use temperature controls with unmatched versatility. So whether your passion is sautéing or searing, stir-frying or grilling, our cooktops provide immediate, controllable and consistent heat, while minimizing any cumbersome cleanup when dinner is finished.

SLEEK, SOPHISTICATED ELECTRIC COOKTOPS.

Offered in a range of sizes and configurations, Miele electric cooktops feature a smooth, durable Ceran® surface with 3D design and Direct Selection touch controls — providing easy cleaning and even heating. Concentric heating zones let you mix and match the way you distribute heat to stockpots, skillets and even oblong casserole dishes, helping you create meals with the ease and efficiency that only Miele can offer.

PRECISION-CONTROLLED GAS COOKTOPS.

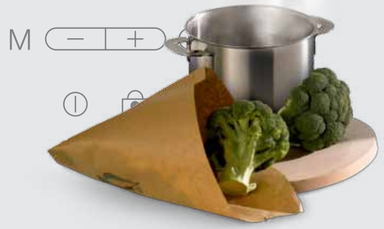
Long trusted by both chefs and novices who enjoy cooking over an open flame, Miele gas cooktops deliver the powerful, even heat you appreciate and the level of control you trust. Available in an assortment of designs and sizes, these easy-to-clean cooktops provide immediate responsiveness, whatever your cooking requires. So you can go from stir-frying at extremely high temperatures to simmering the most delicate sauces with a quick turn of the knob.

Miele's gas cooktops feature a raised, uniform cast iron grate that lets you slide pots and pans smoothly from one burner to another. These durable, enameled grates lift easily, making after-dinner cleanup as effortless as cooking your favorite recipes.

BETTER IS SAFER.

At Miele, safety is a fundamental part of every product design. Our gas cooktops, for example, automatically prevent the flow of gas if an extinguished burner does not immediately reignite. And our induction and electric cooktops shut off after periods of inactivity, protecting your family, ensuring peace of mind and conserving energy.

All Miele induction cooktops come in smooth black Ceran®, an eco-friendly ceramic glass that's exceptionally durable and easy to clean. This premium, high-performance surface not only resists wear, it transfers heat perfectly to cookware, while keeping your cooktop safe and cool to the touch.



Stop and Go. *Whether answering the door or attending to your guests, interruptions don't have to disrupt your dinner preparations. With Miele's Stop and Go cooking mode, all burners automatically reduce to their lowest settings with the touch of a button, ensuring your ingredients sauté and simmer to perfection without burning or boiling over before you return.*

INDUCTION RESPONDS WITH SPEED, PRECISION AND SAFETY.

When you need heat, it's there. When you need precise temperature control, it's there in abundance. By generating a magnetic field that turns your cookware into the heating element, Miele's highly efficient induction cooktops heat foods twice as rapidly as cooking with gas or electric – all while conserving energy. With our smart, integrated technology, heat is transferred to your pots and pans immediately and eliminated as soon as the cookware is removed. The result is an exceedingly safe, energy-efficient way to cook – one that provides you with an even greater command in the kitchen.

COMBISETS™ FOR THE ULTIMATE IN CUSTOMIZED COOKING.

From wok burners to barbecues, grills to fryers, the ways to combine and customize your cooking surfaces are as diverse as the distinct flavors you create. Not only does Miele's signature collection of CombiSets™ invite you to try new cooking techniques – they afford you the flexibility to blend gas, electric and induction cooking to suit your personal taste and cooking style.

STRONG ENOUGH TO CLEAR THE AIR. **QUIET ENOUGH NOT TO BE NOTICED.**

Whether you prefer a bold, visually striking ventilation hood or one that's discreetly integrated into custom cabinetry, Miele hoods are handcrafted with uncompromising quality – and artfully designed to suit all styles. Not only do these powerful, energy-efficient hoods purify the air in your kitchen, they perform quietly, ensuring a comfortable atmosphere for you and your family.

BUILT-IN VENTILATION. SEAMLESS INTEGRATION.

Miele built-in hoods vent and purify the air in your kitchen quickly and quietly, while complementing your design style. Perfect for kitchens where cabinet space is a premium, our hoods integrate easily into custom cabinetry, preserving aesthetics and valuable storage space over your cooktop. And with four power settings precisely controlled by your choice of touch buttons or a joystick, it's easy to adjust your hood's airflow while cooking and enjoying the company of friends and family.

DOWNDRAFTS THAT RISE ABOVE.

Now Miele offers a smart, efficient way to manage cooking odors and steam in your kitchen — without taking up space above your cooktop. Suitable for various installation scenarios, Miele's dynamic downdrafts rise from countertops with a touch of a button to purify the air, then retract completely, leaving your cooktop uncluttered — and your kitchen neat and clean. It's this thoughtful blend of form and function that makes downdrafts an especially popular choice among architects and designers of all genres and styles.

Handcrafted Artistry. *Miele embodies the truth that it's the finest details that make all the difference. After precision tools have cut the framing materials, experienced craftsmen hand-sculpt and assemble each ventilation hood to meet our exacting standards. The result is a perfect fusion of art and technology that will clear the air and grace your kitchen for years to come.*

BETTER IS MORE COLORFUL.

Miele's award-winning ventilation hoods offer the ultimate in performance — and customization. Not only can you choose from an exceptional array of styles and sizes, many of our hoods are offered in RAL colors — a leading international color standard. With more than 200 rich, vibrant colors to select from, you'll find a shade that suits your taste — and your design palette.

With our accessible, durable and dishwasher-safe metal filters, it's easy to keep your Miele ventilation hood operating efficiently with minimal maintenance.

ISLAND HOODS — A DESIGN CENTERPIECE FOR YOUR KITCHEN.

For those who prefer the freedom and convenience of cooking on an island, Miele's suspended island hoods provide an elegant, efficient way to ventilate and illuminate your cooktop. Even while operating at its highest level, these hoods preserve a quiet, elegant atmosphere around your island — where your family and friends are likely to gather as you cook. This diverse collection of hood designs perfectly exemplifies our passion for creating only the most refined, state-of-the-art ventilation solutions, including a motorized hood that opens like a fan and a model which is electronically height-adjustable.

AN ARTFUL EXPRESSION OF STYLE ON ANY WALL.

Bold, eclectic and artisan-assembled, Miele's collection of wall-mounted ventilation hoods lets you showcase your personal style, while being as dramatic or discreet as you choose. Whether you prefer clean, sweeping lines or a hood fitted with a curved glass canopy, these ventilation hoods fit evenly against a wall, venting steam and cooking odors away from you through a stainless steel chimney. Many of our wall hoods offer flush, linear surfaces that are ideal for storing spices, oils and other cooking essentials.

All Miele ventilation hoods come well-equipped with powerful, insulated motors that evenly extract cooking odors and steam from the air — without impeding conversations.

YOUR PERFECT CUP OF COFFEE — **AT YOUR FINGERTIPS.**

Intense aromas. Incredible flavors. And enticing new blends. With Miele's easy-to-maintain coffee systems, your favorite coffees, lattes and cappuccinos are always served at the precise temperature and with no more than the push of a button. So whether you're leaving for work or relaxing after a meal, you can always find time to soothe your senses.

FROM WHOLE BEANS TO PERFECTION.

With adjustable grind settings and integrated frothing technology, Miele whole bean coffee systems are versatile enough to satisfy the most inspired baristas — and smart enough to create cappuccinos, lattes and other drinks with a simple touch of the screen. Not only can you store multiple personal settings, Clean Touch Steel™ keeps the system looking stunning with minimal cleaning. When taken together, these thoughtfully designed details create a unique coffee experience — one that calls you back again and again.

BETTER IS MORE ADVANCED.

Since introducing the world's first whole bean built-in coffee system in 1998, Miele continues to lead with the most intuitive, forward-thinking coffee technology available today. From ergonomic touch-screen controls to insulated milk flasks, Miele innovations make everyday moments more pleasurable — and your passion for coffee more refined.

THE WORLD'S FINEST COFFEES — IN A CAPSULE.

Miele Nespresso® capsule coffee systems deliver flawless performance coupled with unmatched convenience. Designed to seal in the rich flavors of coffees at their peak freshness, Nespresso® capsules offer a distinct way to indulge in a diversity of flavors and aromas. And with more than a dozen roasts from all over the world to choose from, you'll find a blend that suits every friend and family member — and every mood and moment of your day.

All Miele built-in coffee systems feature an elegant, easy-to-use digital interface, and our state-of-the-art Navitronic® controls let you — and your family — save and store the settings of your favorite drinks.

UNRIVALED DISH CARE TECHNOLOGY. **UNCOMPROMISING PERFORMANCE.**

From innovative cutlery trays to specialized dish care settings, Miele's new generation of premium dishwashers ensures your kitchenware is always immaculately cleaned and spotlessly dried. Whether fully integrated into custom cabinetry or pre-finished in Clean Touch Steel™, the revolutionary Futura Series cares for your finest crystal and china with unmatched precision and uncompromised gentleness.

A SIMPLY SMARTER WAY TO CLEAN.

The intuitive design of the Futura Series is all about adaptability. Built into every Futura dishwasher is Miele's advanced FlexiCare Basket System, which securely accommodates even your most precious and delicate items — from large wine glasses to heirloom china and silverware. And with its wide range of basket configurations, Futura delivers instant flexibility to fit whatever cleaning challenge stacks up next.

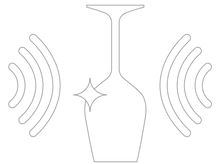
THE NEXT LEVEL OF FLEXIBILITY.

The slide-out cutlery tray has long set Miele apart from other dishwashers, offering greatly improved space utilization compared with a standard basket. Now with the Futura Dimension and Diamond dishwashers, Miele introduces the 3D Cutlery Tray, providing a new level of convenience that adapts instantly to accommodate larger utensils, as well as taller stemware in the upper basket. Plus, every Futura model features the XL Cup Rack and Adjustable Glass Holder, ensuring tea cups, mugs, glasses and stemware of all shapes and sizes are held securely in place.

From rows of baby bottles to large bowls and cookware, the FlexiCare Basket System adjusts on-demand to ensure your Futura dishwasher perfectly matches any cleaning task.

BRILLIANT TECHNOLOGY FOR A BRIGHTER CLEAN.

With innovative AutoSensor technology, which automatically sets the precise cleaning intensity and duration for best results and care, Futura delivers a spotless, confident clean every time — without the need to pre-clean. The Futura Series offers advanced technological features, such as BrilliantLight interior LEDs and a Perfect GlassCare system, which ensures optimal, consistent results with each use.



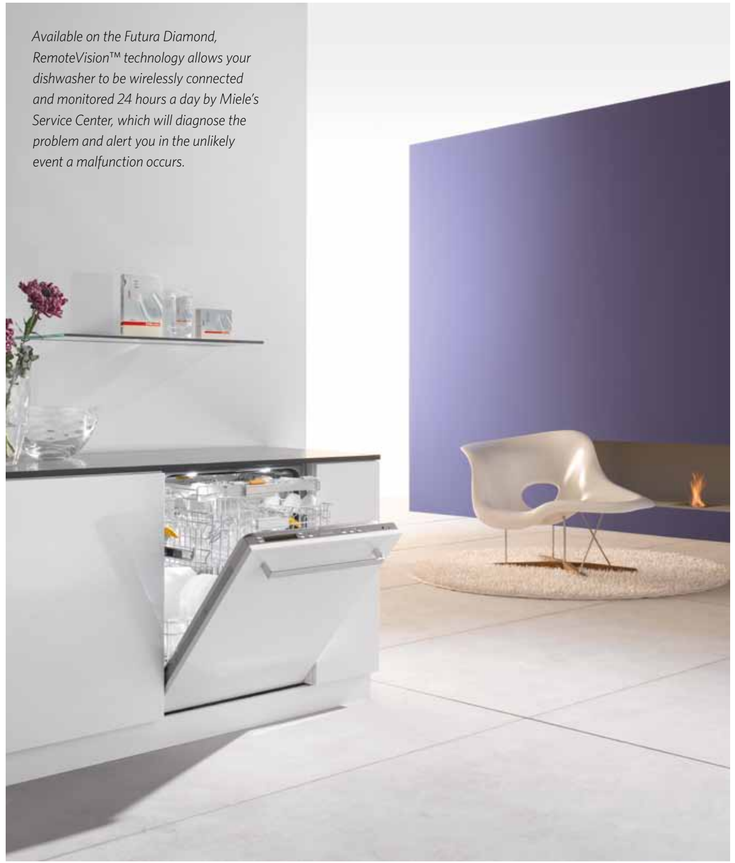
Advanced Cleaning. *The Futura Series delivers a reliable clean that speaks for itself thanks to BrilliantLight — four powerful LED lights that illuminate the dishwasher from the inside out. Beneath the surface, Miele's intelligent Perfect GlassCare system constantly monitors the rinse water's mineral content, while other sensors check temperature, cycle intensity and even air flow — ensuring optimal performance and consistent results with each use.*

Miele's Futura Series is the only dish care product recommended by legendary stemware company Riedel. Handled properly, Riedel glasses can last up to 1,500 washing cycles or an average of 20 years.

RIEDEL
THE WINE GLASS COMPANY
EXCLUSIVELY RECOMMENDS
Miele

PERFECT DRYING FOR PERFECT RESULTS.

Available on the Futura Dimension and Diamond models, Miele's SensorDry feature intuitively adjusts the cycle by measuring the ambient room temperature and humidity to provide spotless and consistently dry results. With AutoOpen™ drying, the Futura Diamond models automatically release the dishwasher door as the chosen cycle concludes to allow air to escape and circulate — perfectly drying even the most challenging surfaces, like plastics. This air circulation also creates rapid cooling for the safe removal of kitchenware once clean.



Available on the Futura Diamond, RemoteVision™ technology allows your dishwasher to be wirelessly connected and monitored 24 hours a day by Miele's Service Center, which will diagnose the problem and alert you in the unlikely event a malfunction occurs.

J.D. POWER AND ASSOCIATES HAS RANKED US:

"Highest in Customer Satisfaction with Dishwashers, Two Years in a Row"

Miele received the highest numerical score for dishwashers in the proprietary J.D. Power and Associates 2010-2011 Kitchen Appliance Study℠. Study based on 13,492 total responses measuring 19 brands and measures opinions of consumers who purchased dishwashers from a retail store or their new-home builder during the previous 24 months. Proprietary study results are based on experiences and perceptions of consumers surveyed in March-April 2011. Your experiences may vary. Visit jdpower.com.

DESIGNED FOR THE WAY YOU LIVE.

The Futura Series is precision German technology at its finest, crafted from durable materials and rigorously tested to maintain its stellar performance for at least 20 years. But superior quality means more than simply building a machine that lasts — it means creating appliances that work in harmony with your home. Futura dishwashers are available in a wide range of exterior finishes, from a discrete, integrated look to gleaming Clean Touch Steel™ — Miele's exclusive surface material that ensures fingerprints and marks are effortlessly wiped clean in seconds.

PEACE OF MIND, GUARANTEED.

Quiet & Clean Guarantee
MADE IN GERMANY

Many of Futura's innovations are designed to inspire confidence through years of reliable use, like the "connect and protect" dual-waterproof system that automatically shuts off the water supply to the dishwasher in the event that a leak or blockage is detected. And, as always, Futura dishwashers are backed by Miele's Quiet & Clean Guarantee. If you are not completely convinced that your Futura is the quietest and best-cleaning dishwasher you have ever owned, we will fully refund your purchase within 90 days.

BETTER IS MORE INTUITIVE.

With advanced technology and versatility, the Futura Series is expertly designed to make cleaning not only easier, but smarter. From fragile wine glasses and antique silverware to bulky pots and pans, Futura adapts to any cleaning task — no matter how delicate or heavy the load.

Futura Diamond models feature an exclusive Extra Quiet Program, which reduces the sound of the dishwasher by 20 percent.

YOUR CLOTHES THOROUGHLY CLEANED — AND **THOUGHTFULLY CARED FOR.**

Designed to preserve colors and fabrics flawlessly, our laundry care systems ensure that even your most delicate garments look like new after every wash. Not only does our unique Honeycomb™ technology and MasterCare™ programs make washing clothes as easy and gentle as possible, they also allow you to conserve water and energy, so you're caring for the earth — while caring for your clothes.

All Miele washers and dryers are available with RemoteVision™, an exclusive technology that connects your appliance securely by WiFi to our technical support center. Should our technicians ever detect an unhealthy fluctuation in your laundry system's performance, we'll contact you immediately for a quick and convenient remedy.

INTELLIGENT CARE FOR ALL YOUR LAUNDRY.

Available in freestanding and stackable washer and dryer configurations, Miele's legendary washing machines clean, care for and ultimately extend the life of your clothes longer than conventional laundry systems. From intuitive controls that simplify cycle selection to the patented Honeycomb Drum™, Miele washing machines ensure a precise balance of water and detergent, temperature and time, soak and spin speeds. The result is an intelligent, easy-to-use washing machine that lets you care for all of your garments — including silks, cashmeres and wools — with complete confidence.

DRYERS THAT TUMBLE QUIETLY AND DRY PRECISELY.

Proven to reduce the need for ironing by more than 30 percent, Miele dryers deliver continuous, heated airflow with precision efficiency to ensure your clothes are always uniformly dried — and never overheated. Our energy-efficient electric and gas dryers are available in both European Standard and generous Eco-Optimized sizes, while our condenser dryers are sound-insulated and can be located discreetly almost anywhere, from kitchen pantries to hallway closets.

PROFESSIONAL QUALITY LAUNDRY CARE FOR YOUR HOME.

Whether you appreciate perfectly pressed clothes — or crisp, wrinkle-free bed linens — Miele's rotary iron is large enough to care for almost any fabric in your home, releasing wrinkles instantly and pressing fabrics evenly. The unique ergonomic design invites you to sit comfortably while ironing, and its convenient fold-away frame allows for quick and easy storage in a closet after you're finished.

BETTER IS GENTLER.

As varied as the colors in your closet, the Miele CareCollection of laundry detergents and fabric softeners is specially formulated to remove stubborn stains, keep colors sharp and preserve the integrity of fabrics. While not required for your Miele washing machine, these superior cleaning products are recommended to make the most of your laundry system for years to come.

With Miele's revolutionary Honeycomb™ washer and dryer drums, your clothes are gently cushioned by water channels during washing and then protected from friction by air pockets during drying. This simple, yet groundbreaking design keeps your clothes looking newer — longer.

BETTER QUALITY AIR, A CLEANER HOME — **FROM FLOOR TO CEILING.**

Whether cleaning plush carpets or polished hardwoods, handcrafted furniture or delicate upholstery, Miele's iconic collection of vacuum cleaners helps you care for all aspects of your home. Our award-winning canisters and uprights also improve the quality of the air in your home, so you and your family will breathe easier — now and for many years to come.

Exemplifying Miele's commitment to elegant design, the S6 Red Velvet is the world's first vacuum to feature a genuine velvet-covered surface, with high-quality flocking for a luxurious look and feel.

THE S5 SERIES

EUROPE'S GOLD STANDARD IN FLOOR CARE.

The world-renowned Miele S5 vacuum cleaner lifts dirt, pet hair and allergens from both smooth and carpeted surfaces with uncanny ease, while maintaining a hushed, quiet atmosphere — thanks to additional sound insulation. These versatile canisters feature Miele's exclusive 12-stage AirClean Sealed System®, combining electrostatically charged FilterBags™ with your choice of advanced, high-quality filters. Many S5 models feature non-slip footswitches that let you increase and decrease suction power with a quick tap of your foot, and select models offer an automatic setting that self adjusts your vacuum cleaner to accommodate different floor coverings and carpet depths.

THE S6 SERIES

THOUGHTFULLY CONSIDERED. BRILLIANTLY REFINED.

With the S6, Miele has engineered a brilliantly refined cleaning solution — one conceived to maximize performance and efficiency in an elegant, space-saving design. Weighing less than ten pounds, its durable, innovative skeleton construction is built to capture and securely retain more than 99.9 percent of dirt, dust and allergens — while its efficient, near-silent motor delivers significant noise reduction without sacrificing power. The result is a jewel of a canister vacuum cleaner: thoughtfully considered, flawlessly fashioned and timelessly desirable.

THE S2 SERIES

PROVEN PERFORMANCE, ACCESSIBLE VALUE.

Miele's S2 vacuum cleaners deliver exceptional cleaning power perfectly packaged in an agile, lightweight body. The S2 is designed to clean and care for all the surfaces in your home. And with six distinct power settings — all clearly displayed on a front-mounted rotary dial — it's easy to vary your vacuum cleaner's suction according to the carpet pile, flooring and fabrics you're cleaning.

THE S7 SERIES

UPRIGHT VACUUMS THAT MOVE AS GRACEFULLY AS THEY CLEAN.

Miele S7 upright vacuum cleaners provide the ultimate in maneuverability and responsiveness. Innovative SwivelNeck™ design lets you rotate the vacuum around chair legs with little more than a turn of your wrist. Or you can extend the S7 into its unique flat-to-the-floor position to reach under beds, coffee tables and other low furniture. At all times the spring-loaded roller brush maintains optimal contact with the floor for ideal suction. The result is a flexible, edge-to-edge vacuum cleaner that thoroughly cleans and carefully preserves the beauty of your floors, rugs and carpets.

From soft-bristled upholstery tools to floor brushes that twist and turn into tight places, Miele offers a wide array of standard and specialty accessories that help you reach farther, clean deeper and finish faster.

THE UNIVERSAL UPRIGHT

ONE EXCEPTIONAL VACUUM, MULTIPLE CONFIGURATIONS.

The Universal Upright vacuum cleaner is ideal for light, quick cleaning tasks on a wide range of smooth flooring surfaces as well as low- to medium-pile carpeting. Unlike many stick vacuum cleaners, the Universal Upright provides ample pickup power, cleaning fine particulates and debris easily and efficiently. The upright's modular design lets you configure it several different ways — including converting it into a handheld — and its compact, lightweight design allows for convenient storage in closets or on boats, RVs or anywhere else you'll need touch-up cleaning.

BETTER IS PURER.

The only way to really clean effectively is by capturing dust particles and then containing them securely. Our nine-layer electrostatically charged AirClean FilterBags™ feature a self-locking collar that keeps microscopic dust and allergens safely trapped inside, even during disposal. This color-coded collar matches your vacuum to eliminate confusion when purchasing replacement AirClean FilterBags™ — and helps ensure a pure, healthy home for you and your family.
